Complete

How the PowerMax Complete Works

Out of the box PowerMax Complete is ready to install!

Simply locate the control panel in a central location and install movement sensors, door contact and safety devices as required. Using the existing house phone line the PowerMax Complete can be used to dial a central station, for 24hr monitoring, or via a voice dialler directly to the house holder, friends or family.

Where to place components in the home

- A Door Contact
- B Pet PIR
- C Smoke Detector
- D CO Sensor
- E Flood Sensor
- F Internal Siren
- G Panel
- H Wireless Siren

**NO WIRES
NO FUSS!**

Other useful features of the PowerMax Complete

Safe At Home

- Arm the system using the home set mode for security during the night hours.
- Portable panic buttons give you extra security whilst anywhere in the house or garden.*
- Child monitoring allows the PowerMax Complete to call mum or dad once their loved ones arrive home.

* Subject to radio range. RF repeater available (MCX-600).

Pet Tolerant

Visonic's patented movement sensor technology allows your pets to move freely in areas covered by the sensor, enabling you to protect rooms that would not normally be covered with normal sensors.

In areas where pet tolerant sensors are not an option i.e the animal/s are above 38Kg (85lb) then a combination of door contacts, shock sensors, window PIR sensors (curtain) or glass break sensors can be used. All are wireless so cabling is not a problem!

Be Connected

- Central station ready with onboard modem allowing alarm signals to be sent directly to a 24 hour monitoring centre for guarding or police response.
- Built in voice dialler for private monitoring via friends and family.
- GSM and GPRS connectivity for situations where a PSTN telephone line is inaccessible or where dual communication paths are required.

Customising the PowerMax Complete

Optional Components

Detection:

PIR/PET PIR

NEXT/NEXT K985 MCW
Product Ref. 0-3591-D / 0-3592-B

QUAD PIR

DISCOVERY QUAD
Product Ref. 0-3633-A

DOOR CONTACT

MCT-302
Product Ref. 0-2286-A

Visonic
For a secure way of life

Open up a world of connectivity

Wireless technology plays an important part in our lives whether it's mobile phones, car remote controls, WiFi internet or Bluetooth. Using Visonic's Powercode™ products, professional wireless security is now also a reality.

Be Connected, Be in control with Powerlink

For the ultimate web-based experience, open up a world of connectivity to your security system by upgrading to PowerMax Pro and with the Powerlink broadband interface.

Using a standard Internet Explorer browser Powerlink allows a secure connection from almost anywhere in the world allowing you to:

- Remotely arm and disarm
- Check the system status
- View wireless observation cameras
- Manage your contacts and alarm notification
- Control home automation appliances

** Powerlink is available for compatible PowerMax panels only. Subscription service required

Be alerted to alarm activations whenever, wherever you are via your mobile phone or email.** This includes real-time video images of the moments before and after the alarm was triggered to help you decide best how to deal with the event.

▲ The online web-based Powerlink broadband interface.
